EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims:

This application is in condition for allowance except for the presence of claims 6 and 8-10¹ directed to species II non-elected *without* traverse, there being no allowable generic claim. Accordingly, claims 6 and 8-10 have been cancelled.

Reason for Allowance

2. The following is an examiner's statement of reasons for allowance:

The claims are allowed for substantially the reasons advanced by applicant in the remarks accompanying the June 5, 2006 amendment. It should additionally be noted however that applicant's argument that in Sauer (US 3,605,717), the apertures are formed for the purpose of providing the *main* air flow in the chamber, is not agreed with insofar as Sauer designates the apparently optional flow through apertures 21 as a "secondary" air circulation (col. 13, lines 43-50), the main circulation being illustrated in fig. 4. Applicant's other comments/arguments with respect to this reference are however agreed with. Additionally, it is stressed that Sauer is directed to a gas fired

convection oven for processing food rather than an autoclave for curing a tread strip to a tire casing as claimed, these differing substantially in structure, function and manner of operation (e.g. note that the oven in Sauer is certainly not a pressurized chamber). As such, it is not considered that the ordinary artisan would have reasonably looked to the teachings in Sauer for modifying an autoclave for curing a tread strip as in the admitted prior art.

None of the closest prior art, then, whether taken singly or in combination would teach or render obvious an autoclave for curing a tread strip to a tire casing with heated, pressurized air, including an elongated chamber having a frame for supporting tire casing and tread assemblies within the chamber and a heat exchanger for heating air and the air supply/circulating/turbulence generator structures configured and operable as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Geoffrey L. Knable whose telephone number is 571-272-1220. The examiner can normally be reached on M-F.
